Instructor Related Questions: Michael Running Wolf (3 comments)

### Q: What were the strengths of this course and/or this instructor?

- 1 Professor Running Wolf was absolutely amazing!!!! He is so engaging, inspiring, funny, knowledgeable and just has a great stage presence whereby when he teaches, one has no problems not only following along, but also remaining engaged during the whole lecture. He taught us the many different aspects of XR and taught us about things that we wouldn't have otherwise thought of. I love the flexibility in his teaching, where he tailors the assignments to our interests and where we need the most help. Another thing I enjoy about his teaching is in his willingness to allow us to express our creativity with this technology and course. Very few instructors actually care enough to let us pursue our own interests in the course that we are learning and not only did he allow us, he encouraged us to be as creative as we could be. I am forever thankful for this opportunity and honestly, this is THE BEST CLASS I HAVE TAKEN SO FAR!!! Professor Running Wolf is an asset to this university.

### Q: What could the instructor do to make this course better?

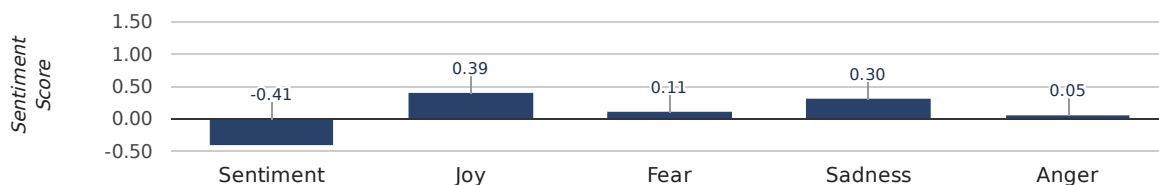

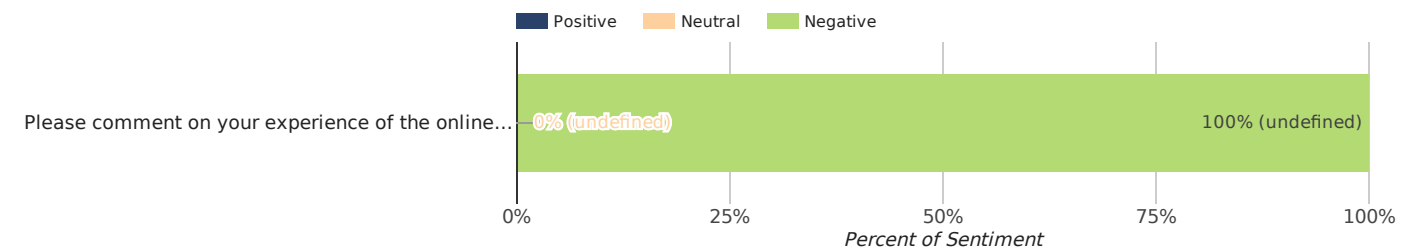

- 1 Maybe less assignments but make the assignments include more than one topic and we can have a longer time to work on it. I just felt like I was constantly trying to catch up on my assignments because of how enthusiastic he was in wanting to teach it to us

### Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

- 1 I had a conversation with Professor Running Wolf when I was falling behind on some of my coursework. He was so understanding, patient, and supportive and for that I am very grateful. I wish he could teach the SFBA campus again. Given that this technology is looking like it's the next big thing, I hope that his course continues to be taught here in the SFBA and everywhere else across the NU network

Questions to Assess Students' Online Experience (1 comments)

### Q: Please comment on your experience of the online course environment in the open-ended text box.

- 1 He made virtual reality work virtually! He was very keen on making sure the 4 of us Silicon Valley students were heard and were engaged. The tech gear in the Vancouver campus is every accommodating for these live-cast classes, unlike the SFBA campus where we are still experiencing technical difficulties. ★★☆☆☆

Student Self-Assessment of their Effort to Achieve Course Outcomes (1 comments)

**Q: What I could have done to make this course better for myself.**

- 1 Start the Unity Developers Course sooner or before class so that I am ahead of the game or at least have learned the steep learning curve that is Unity
