Instructor Related Questions: Albert Lionelle (15 comments)

Q: What were the strengths of this course and/or this instructor?

- 1 Responsive, available, and fantastic instructor.
- 2 He was very attentive and understanding. He was open to any questions I had and was quick to respond and help.
- 3 Everything! Available outside of regular hours which is extremely awesome and I appreciated it so much. He offered weekly learning sessions on Wednesdays where we would cover a TON of material and even material that is tech related! The online program should take Lionelles class structure and use it for the other classes, if they did that then this program would be the best!
- 4 Albert is stern when it comes to grading but fair on giving chances and additional time to ensure that we are learning the concepts. He was always very responsive to questions and feedback from students. His lessons show his experience and expertise in programming and C.
- 5 For each assignment, Albert prepared, and provided very clear instruction. He guide student to build course concept first then lead student to learn in details.
- 6 Their ability to meet the students where they were at with the material.

Q: What could the instructor do to make this course better?

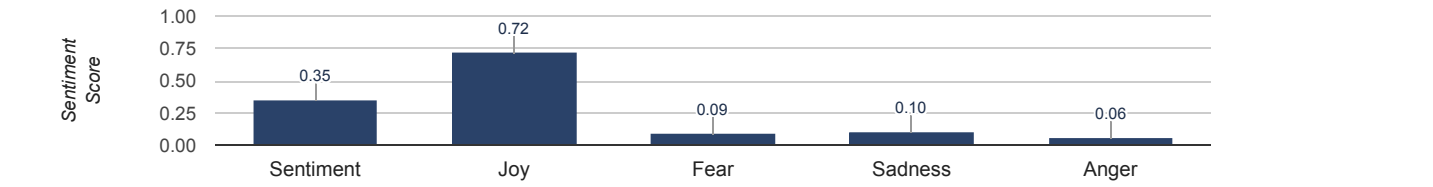

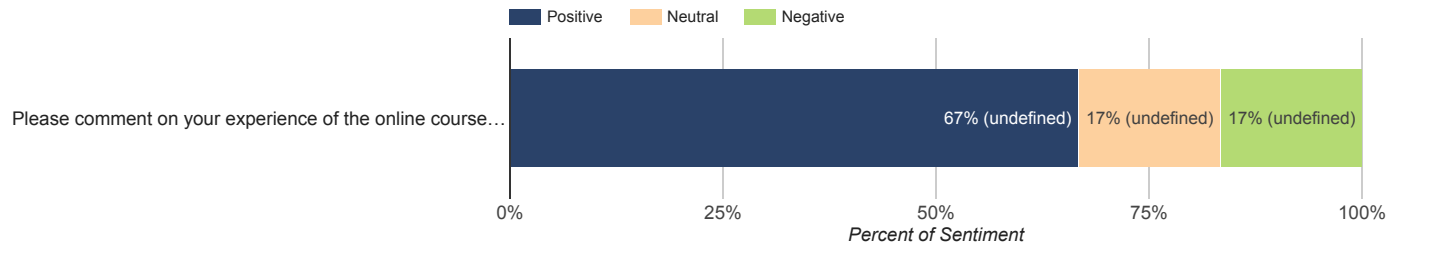

- 1 Keep it up!
- 2 The ramp-up to using header files, make files, test suites and terminal interfaces was a bit fast and overwhelming at times. Introducing those things earlier and/or adding extra class materials that explain how it works would have been very helpful.
- 3 This is a bit of a stretch considering how much time Lionelle put into his class but if he were able to make more of those weekly live sessions then it could be better but honestly he does alot as is.
- 4 All good.
- 5 N/A I though it was great as is.

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitatng inclusive learning.

- 1 I really liked that he gave us a long time to be able to finish the assignments for the "no questions asked" period. He made it very clear that he understood students learned at a different rate and have busy lives, so him doing this was very helpful.
- 2 The gradescope was awesome. It atleast shows that we are going down somewhat of a right path when making the code.
- 3 Albert is great.
- 4 Professor Lionelle is unlike any other professor I've had. He is fantastic as teaching new concepts, and always finds a way to encourage us.

Questions to Assess Students' Online Experience (6 comments)

Q: Please comment on your experience of tthe online course environment in the open-ended text box.

Q: Please comment on your experience of the online course environment in the open-ended text box.

- 1

Once again, the master of online instruction. Please keep doing what you're doing. ★★★★★☆
- 2

The modules were organized and easy to navigate each week. ★★★★★☆
- 3

I wish there was a better way to indicate that team members are not at all contributing to meetings (meet/no messages/etc) ★☆☆☆☆
- 4

Professor Lionelle has the best classes. I was challenged throughout the semester and was able to grow and learn as an outcome of this course. Yet, the assignments were difficult, they still were able to give me a sense of the things I didn't know. Which helped facilitate being able to learn the material. ★★★★★★
- 5

I like the way Albert teaching us and I've been enjoying the whole course. I think Albert fully understand how students learning curve will looks like and add on appropriate content accordingly. ★★★★★★
- 6

It was a challenge but I learned a lot ★★★★★★

Student Self-Assessment of their Effort to Achieve Course Outcomes (7 comments)

Q: What I could have done to make this course better for myself.

- 1

Could have focused a little more on this course but was stuck on 5004 a lot
- 2

Utilized the professor and TA's help more for things I didn't understand
- 3

starting the 2 week homeworks earlier / scheduling how much I need to finish in the first week to stay on track
- 4

Scheduled more time with the TA's. It wasn't until towards the end that I made an appointment with one of the TAs for this class (even tho we used the TA session for the 5004 class materia!).
- 5

Seek help sooner instead of thinking I will figure it out on my own eventually.
- 6

Please provide more courses teaching by Albert
- 7

Quit my job and focus more on the material. I needed more time to play with the skills I was learning week by week.
