Instructor Related Questions: Brianna Dym (5 comments)

Q: What were the strengths of this course and/or this instructor?

- 1 This course allowed me to learn a lot of material related to object oriented programming. I like how we were able to explore different design patterns to see how different programs may be structured. The lab assignments were my favorite because, though they had a set goal to accomplish, the assignment was also general enough to be able to be creative. Dr. Dym was very supportive throughout the entire course. She cheered us along as we completed assignments, while also making sure to provide helpful feedback and tips.
- 2 The instructor was enthusiastic about the assignments and enjoyed talking about and trouble-shooting student projects and ideas.

Q: What could the instructor do to make this course better?

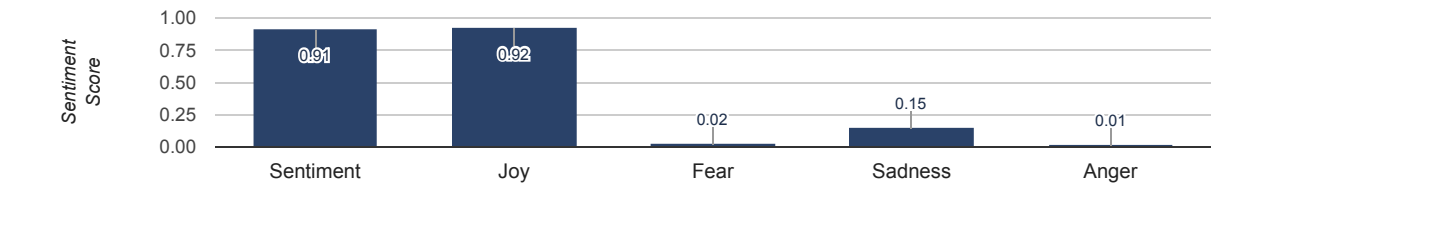

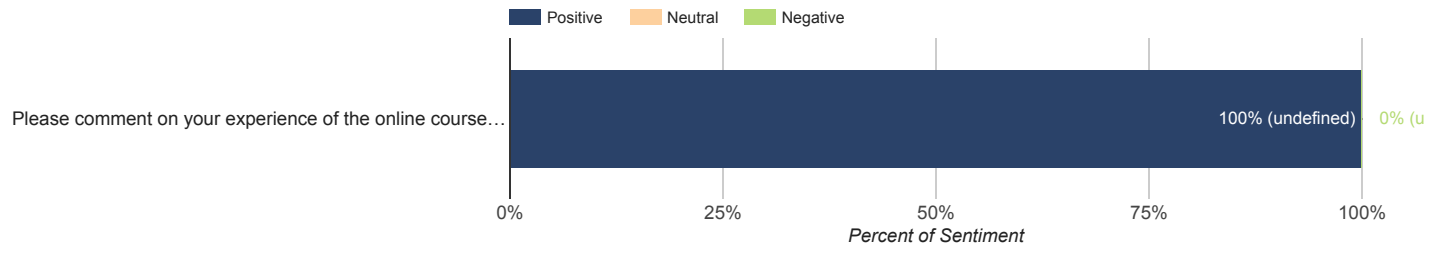

- 1 At the beginning of the course I found it more challenging because I didn't quite know how to use the Java syntax. It would be helpful to go over the syntax more thoroughly at the beginning so it can be better utilized throughout the rest of the course.
- 2 I would have preferred for recitation to be always used as time for us to practice and implement code, rather than sometimes having it used as additional lecture time.

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

- 1 The instructor was very supportive and regularly made a point to ensure everyone understood the concepts. The instructor encouraged us to be creative and gave specific positive feedback about students' unique program designs.

Questions to Assess Students' Online Experience (1 comments)

Q: Please comment on your experience of the online course environment in the open-ended text box.

- 1 Having everything together on one Canvas page helped a lot. Having slides and example code available was also a great reference tool when working through quizzes and labs. ★★★★★

Student Self-Assessment of their Effort to Achieve Course Outcomes (1 comments)

Q: What I could have done to make this course better for myself.

- 1 I definitely learned that it is helpful to get started right away on assignments, because this meant that I could come to recitation with specific problems and questions to ask.
