Instructor Related Questions: Albert Lionelle (24 comments)

**Q: What were the strengths of this course and/or this instructor?**

- 1 The instructor is always supportive and encouraging to students and help us adjust our mindset.
- 2 I was able to foster strong connections with my teammates in the last 3 months we have been doing team activities together.
- 3 Group assignments were always very helpful preparation for the individual homework. The way things were interrelated was very useful.
- 4 1. Homeworks are useful to learn the abstract  
2. The final project is a comprehensive assignment that incorporates knowledge from all previous assignments, and it is designed to be highly expandable and practical. It also emphasizes collaboration.
- 5 Same as stated in other 5004 evaluation.
- 6 The instructor was available to assist students outside of class.

- 8 N/A

**Q: What could the instructor do to make this course better?**

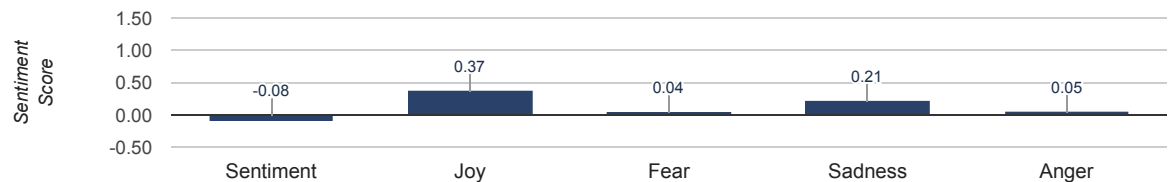

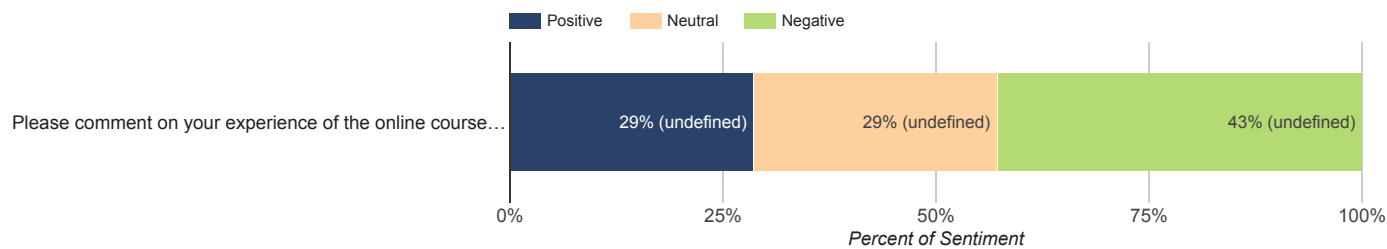

- 1 As a student with no basic knowledge of JAVA, I found it a bit difficult to start and would have liked to see more of the basics of the code in the beginning section.
- 2 Everyone in my team actively participated and helped as best as they can. However individually I don't think I learned as much, I feel like I was learn better if the TAs guided us through each team activity.
- 3 Sometimes it was like the blind leading the blind and to have the instructor or a TA pop into our group meetings from time to time to give us guidance would've been helpful.
- 4 1. Hold more live classes, even if they are online, rather than relying solely on pre-recorded videos.  
2. If videos are necessary, they should be accompanied by subtitles and more detailed explanations.
- 5 Same as stated in other 5004 evaluation.
- 6 reduce the learning curve
- 7 Actually provide a structured time where at least a TA is involved for these "team activities" that replaced recitation. I have never had a recitation or lab where there was completely absence of faculty and TAs. I have had positive experience with Northeastern until this course, and this course makes me doubt the level of education Northeastern provides, especially as this professor is a director in the program.

**Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.**

- 1 The teacher consistently expressed encouragement and inclusion of students.
- 2 Team activities is a very unique way of teaching that i think works better in a traditional classroom setting. Its a bit difficult when there's no TAs around us when we have questions live as we are doing the team activities. We're left to google/guess our way around it. Still, i applaud Lionelle for thinking outside the box and creating team activities because i got to meet a 4 brilliant and friendly team members. I will definitely reach out and keep in touch with them even after this class. We're planning to meet up in Boston during the fall for a lunch/dinner!
- 3 1. Keep final project teamwork.  
2. Hold more live classes.
- 4 Same as stated in other 5004 evaluation.
- 5 reduce the learning curve

Questions to Assess Students' Online Experience (7 comments)

Q: Please comment on your experience of the online course environment in the open-ended text box.

- 1 I think the content of the video lessons needs to be updated, the teacher in the videos is not very good ★☆☆☆☆
- 2 The discussion with other students was helpful ★★★★★
- 3 Doesn't feel much like a classroom because there's no real TA lecturing. We're meant to figure it out within ourselves/among teammates and sometimes we don't know what the right answer is or where to start. ★☆☆☆☆
- 4 Online videos were very poor and need a huge overhaul or there needs to be a synchronous lecture provided instead. ★☆☆☆☆
- 5 The team activities were helpful in reinforcing my learning and practicing how to talk aloud about coding solutions ★★★★★
- 6 - ★☆☆☆☆
- 7 N/A ★★★★★

Student Self-Assessment of their Effort to Achieve Course Outcomes (8 comments)

Q: What I could have done to make this course better for myself.

- 1 I need to learn about code ahead of time.
- 2 N/A
- 3 I could have come more prepared to the team activities.
- 4 Same as stated in other 5004 evaluation.
- 5 Consistently read the team activities and modules before
- 6 reduce the learning curve
