Q: What were the strengths of this course and/or this instructor?

- 1
- Communicative, respectful, always came prepared for the class with proper notes, created interesting assignments, and good hands-on active learning assignments.
- 2
- Lectures had both lectures/notes and in-class exercises, which I really appreciated. The out-of-class assignments were progressions of the in-class assignments and helpful for learning. The assignments were also structured to allow us to explore/choose the depth that we wanted, to a certain extent, while still having clear grading criteria.

Q: What could the instructor do to make this course better?

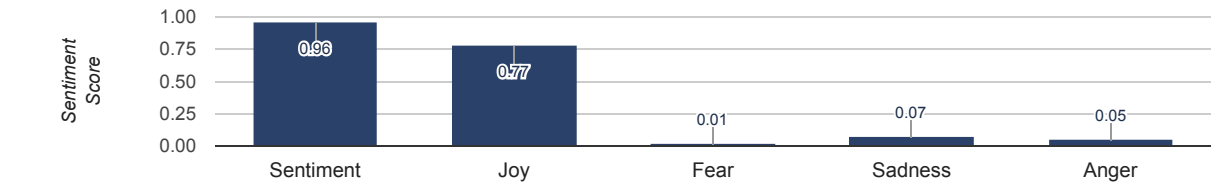

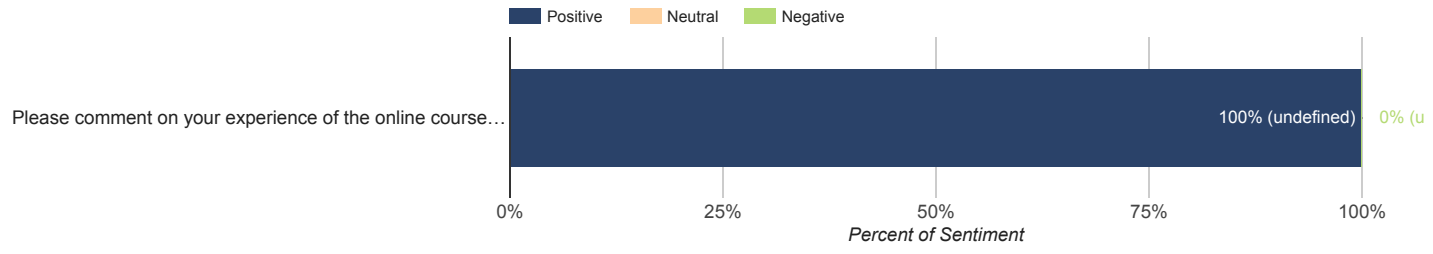

- 1
- Covering more mathematical aspects of the advanced computer vision algorithms would be more helpful
- 2
- It would've been nice to spend a little more time on modern-day problems in computer vision/pattern recognition.

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

- 1
- Sorry to be so blunt, but the professor was not qualified to teach this course. It had very little to do with the fact that this was his first time teaching it. He simply was not educated enough to teach the course at a graduate level on a subject he has no expertise in. He literally admitted that he was teaching himself the concepts by watching 3blue1brown videos in the days leading up to giving a lecture on deep learning. This was an utter failure by the Khoury and Roux administration to put him -and therefore, the student students- in a position to fail like this.
- 2
- The professor is punctual, soft-spoken, respectful, and has good knowledge of the subject at hand.
