Q: What were the strengths of this course and/or this instructor?

- 1 I believe Cristian is an expert who has a deep understanding of this topic, although sometimes he may overlook the gap between what students already know and the material he is presenting.
- 2 Close to the real-world practice.
- 3 Great explanations of concepts and broke down complicated ideas well.
- 4 N/A
- 5 Organized materials and content were beneficial.

Q: What could the instructor do to make this course better?

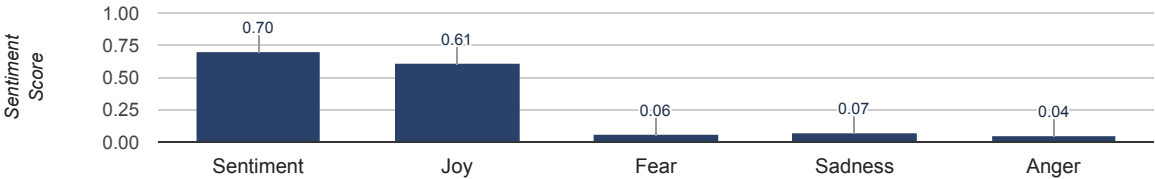

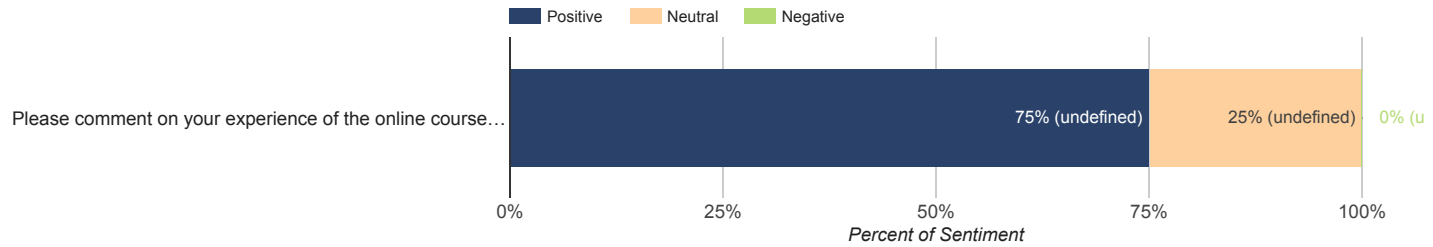

- 1 1. I think the connections among the topics are not strong enough, and sometimes the learning materials provided are not systematized either, which leads to not being able to apply all we learnt into a whole web development project after learning every topic.
2. The class time can be used more efficiently, for example, providing more examples. Because the quizzes sometimes are really easy, so when you start doing the assignments, you may struggle for a while to figure everything out.
