**Q: What could the instructor do to make this course better?**

- 
- 1 Assignment grading feels a bit subjective by different TAs. It might be helpful to implement an auto-grader to test assignments.
- 
- 2 Hire more capable TAs.  
Things that this year TA did:  
Don't know the answer of my question during OH  
Ask me to post on piazza so that other TA can answer  
Nobody answer my piazza post  
Change assignment requirement close to deadline and did NOT notify everyone  
Give me wrong answer to my question during OH  
Harsh grading standard
- 
- 3 1 reduce homework by using "optional tasks", the workload is too heavy  
2 provide clear instruction docs or details about how to do the project  
3 Some TAs cannot debug
