#### Q: What were the strengths of this course and/or this instructor?

- 1 The course projects were informative and beneficial although they were poorly explained at times. The project prompts could have been much more clear.
- 2 The projects assigned in the course were very helpful exercises for working through the concepts we covered.

#### Q: What could the instructor do to make this course better?

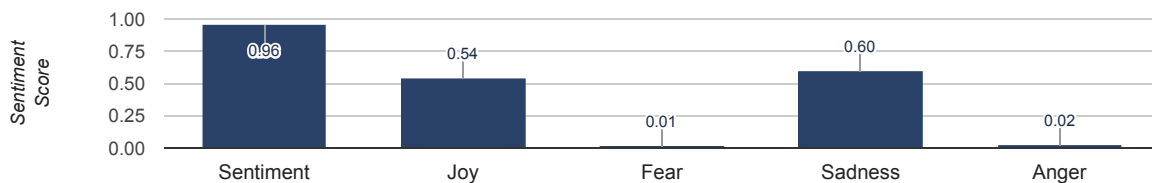

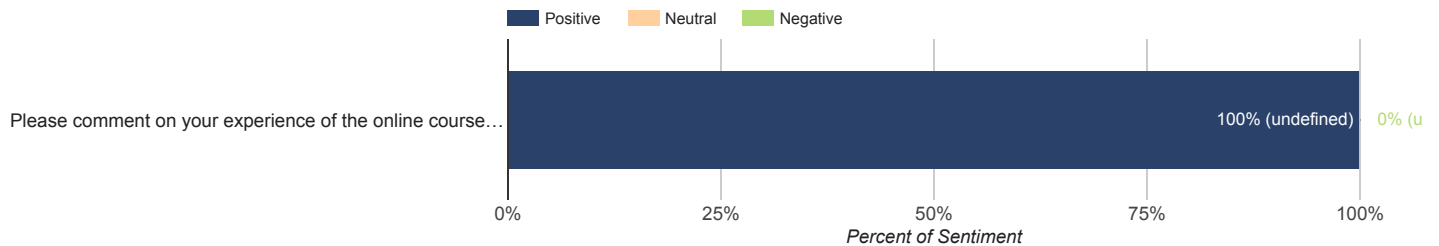

- 1 Attend the recitation in person.
- 2 It would have been helpful to know at the beginning of the semester that the projects in recitation would take significantly longer than the recitation period, and would require out-of-class time to be dedicated to them.  
  
The lab instructions could be edited for clarity. I know this is reflective of real life, but often we spent the first 45 minutes of lab trying to figure out what the assignment was, so we would run out of time to work on the lab and ask implementation questions.  
  
Projects 6,8, and 9 were where I had the most confusion over what the assignment was, and what the deliverables were supposed to be. Having a list of file names and sample output would be helpful

#### Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

- 1 The instructor was not available during this class period and only was on Zoom for less than 5 minutes before departing. This was not helpful as this course is for working professionals. We don't always have time to attend office hours. It would have been helpful to work through project questions with the instructor in the recitation.

### Questions to Assess Students' Online Experience (1 comments)

#### Q: Please comment on your experience of the online course environment in the open-ended text box.

- 1 Joining the recitation remotely was definitely helpful from time to time, but I preferred the easier communication with my classmates when I attended in person. ★★★★★
