Instructor Related Questions: Jose Annunziato (27 comments)

Q: What were the strengths of this course and/or this instructor?

1   Helpful, kind person

2   Really detailed, devoted a lot of time into office hours and support problem solving step by step.

3   The professor was very enthusiastic and willing to help us solve our problems

4   Passion for a complicated Process. A thorough end-to end expertise

5   1. A lot of notes for preparing the hw
    2. step by step to show the implementation

6   Being able to cover so much material in the accelerated class

7   The instructor is very devoted and helps are always there for me.

8   enthusiasm

9   The iterative nature of the Kanbas project was really cool. I really enjoyed building something from scratch. The notes and assignment walk throughs were extremely helpful. The TA's were very good about being available to assignment walk-throughs and regrades.

10   The teacher is very organized and knows his stuff. The TAs were amazing and always there to help!

### Q: What could the instructor do to make this course better?

1   Hold more office hours

2   Already really good.

3   Reduce some of the workload.

4   It might help de-clutter the concept space if, after we learned new techniques (e.g. Database Files on web app side, moved to server side, moved to MongoDB) we also took the time to remove old references and pathways.
    Also, towards the end, some lectures veered slightly from the Lab & Assignment material (maybe tech difficulties related.) which made finding outside resources necessary.

5   less workload for last two kanbas assignment

6   While the concept of the assignments is good, I think there were too many inconsistencies that made it feel like I was fighting the assignment and not the knowledge of the content.

7   Take into consideration the amount of time needed to complete each assignment due to this class being accelerated

8   not much

9   The office hours map did not reflect the true office hours schedule, which made things a bit harder to plan

10   Sometimes the assignments involved a lot of copy/pasting and made it a little difficult to feel like we were learning the material. The rendering w/ mongo/render also caused a lot of problems.

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

1   Cared for students and understood students' weaknesses, was able to troubleshoot better than most professors

2   Reduce some of the workload.

3   Very Passionate Prof. Taking a class from 0 to fullstack is not easy, and his lesson plans are well suited to walk you through.

4   The instructor was efficient at being available to students

5   The instructor is very devoted and helps are always there for me.

6   Having both a visual video component, and a written medium for lectures and assignments was really helpful because you could attack your learning process from both angles.

7   I enjoy the professors enthusiasm and detail! Sometimes the lectures seemed to just be copy/pasting what was in the assignments, but whenever we asked questions, he was very knowledgeable and supportive.

Sentiment Score

1   Very helpful ★★★★

2   For the students in summer2, I think the course pressure is very high, especially all the A1-A6, and I think the difficulty after the A5 is very high ★★★★☆

3   Instructor and TAs made efficient use of Piazza to remind us about online lectures and office hours ★★★★★

4   The lecture were nice and the recording, really catered to different learning while creating an opportunity for a traditional lecture style ★★★★★

5   fine ★★★★★

6   I appreciated how there was an option to watch the lectures live, but it still maintained the structure of a asynchronous class. ★★★★★

7   The course was very organized. I did not attend the live sessions much due to scheduling, but all of the zoom recordings were often there within a day. ★★★★☆

8   Everything is good! ★★★★★

Student Self-Assessment of their Effort to Achieve Course Outcomes (10 comments)

Q: What I could have done to make this course better for myself.

1   Attended office hours more

2   I might have to reduce the amount of homework per week to give us time to work on something else in this course, for me, all my time is spent on homework, and as soon as this is done, the next homework comes

3   Not Taken it During the Truncated Summer, nor while working Full-time.

4   More detailed about the homeworks notes pdf

5   Begin assignments earlier

6   Spent more time

7   not much

8   I traveled a bit during summer two and there were times where I was a bit overwhelmed. All in all though I feel like it was pretty managable

9   If I had more time, I would have tried and met more during live times rather than just the recordings.

10   Maybe i can start to learn something in advance so i will have more time to finish the final project.
