Instructor Related Questions: Rasika Bhalerao (33 comments)

Q: What were the strengths of this course and/or this instructor?

1   Answering questions clearly.

2   The instructor is able to cover majority of the content during lectures and combines sliding showing the live coding very well

3   instructor is prepared for the classes, on time and assignments are clear instructed.

4   Attentive and available for students' questions.

5   clearly, know what to do

6   Knowledgeable and nice.

7   always active to answer the students' questions

8   The professor responded to emails and messages very fast and provided clear feedback.

9   Everything is good!

10   can learn java, this object-oriented language. can do some simple project to take exercise.

11   it has well organized materials.

12   The final project gives me a deep understanding of this course.

### Q: What could the instructor do to make this course better?

1   Distributing the contents better.

2   The time arrangement for the lecture could be slightly better, as it is usually very rushing at the last 30mins. Could maybe go through quiz answers at the end and prioritize the lecture content

3   It would help student better understand the course materials if instructor could provide any relavent online courses before the lecture. Also I would appreciate to have a full structure of the course contents so if the course is affected by holidays we could have some make-up courses in the following business days.

4   Have the homework assignments deadlines set on a specific date instead of having students vote.

Some concepts introduced within one lecture don't seem to connect with each other, creating a sense of gap/jump.

5   For the assignment, I am not suggesting voting for the assignment, as it will save time towards the end of the semester. just do the usual,

6   could deliver the knowledge more understandable for some complicated topics.

7   make the concept clear

8   It'd be better if the professor can slow down when they are talking about more advanced concepts, especially during live coding. When it's close to end of the class, the professor always rushed to finish the last (also the most difficult) coding problems.

9   Maybe the instruction of our assignment can be clearer

10   more difficult and more engaging by providing more projects.

11   virtual lab or both

12   Great;

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

1   Answering questions clearly.

2   The in class code demo is good, it increases the engagements of students. But i found it hard to follow every step while tyring to listen to the instructor. Also some assigments would require more time to debug, would appreciate if we have more TA hours. Some TA was not punctual and had very limited interatction with students. Should have proper screening while recruite TAs.

3   The instructor welcomes questions, and provides sufficient feedback quickly.

4   N/A

5   no

6   The slides were very bare-bone and not visually helpful in learning programming.

7   Everything is good

8   teaching skills to make students more involved.

9   I like that the TA's would give us feedback on our homework and we have a chance to correct our mistakes. This made me understand more thoroughly.

Q: Please comment on your experience of the online course environment in the open-ended text box.

1 Online course material is kind of helpful, but don't have time to go through the videos every week ★★★★★

2 5004 is on ground, there are some online courses modules but i did not watch them ★☆☆☆☆

3 The videos are out of orders and difficult to follow, especially for Module 5,6. ★★★☆☆

4 I feel good about attending online courses because it saves me time traveling to school, allowing me to have more time to complete homework. ★★★★★

5 Keep the form of online attendance please. ★★★☆☆

6 online course is not that organized. ★★★☆☆

7 The pre-recorded videos on Canvas modules were a little outdated but the overall contents were well-organized. Watching those videos before class really helped me learn better in the in-person class. ★★★★★

8 Good ★★★★★

9 N/A ★★★☆☆

10 excellent ★★★★★

Q: What I could have done to make this course better for myself.

1 reviewing the material more.

2 Spend more time doing self studying

3 I could prepare for this course by watching some online tutorial since this course is affected by public holidays and 4 course missing due to the holiday, I feel some contents are missing and was surprised to find that there was none make-up course

4 I used other materials (tutorial videos, books) to help me along taking the course.

5 For the assignment, I am not suggesting voting as it will save time towards the end of the semester.

6 No idea

7 could make the concept more clear

8 Review more often

9 study more

10 do more exercise to deepen understanding about the concept and applications.

11 I should learn all the materials in advance before the classes begin.
