3 Have a lecture on how to write test cases.

4 Maybe make the concepts taught in labs to come a bit before the assignments. The labs usually gave a nice example to practice the concepts but sometimes they were very close to the actual assignment, so not enough time to learn and then implement it in the actual assigments. Specially the one in which they teach how to 2 peop[le can work on same code where ones part depends on others. This one would be better after the groups are made and made to do amongst the group members itself.
