Instructor Related Questions: Monica Coady (10 comments)

Q: What were the strengths of this course and/or this instructor?

1   The low-level thinking cultivated by the Computer Systems course is about it's biggest strength especially with it's broadening of the impacts and implications of the programs and processes we execute as Computer Scientists.

   The instructor's enthusiasm is infectious and coming to class is always something to look forward to. Similarly, the instructor is supportive of student actually learning through reading, research, and collaboration.

2   Yvonne is literally enthusiastic for the course, which I do appreciate. Also, she doesn't have accent and speaks clearly.

3   super nice, super energetic, great connection to the industry

4   Yvonne is so passionate, knowledgeable, and encouraging all the time.

Q: What could the instructor do to make this course better?

1   Clearly outline homework tasks with clear deadlines and wait for class to end before posting next homework.

2   Modify marking criteria. Currently, the mark is given based on the interview's performance, rather than the homework, or the code we wrote. I've seen my teammates not writing code(weekly simulator project) at all and gains a good score, which is ridiculous. How can a computer science student earn a high score without even writing code?

3   reduce discussion on research papers and cover more contents from the textbook, e.g. contents about file system

4   Allocating the teaching time to cover all the topics evenly could help us to learn more from the materials.

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.
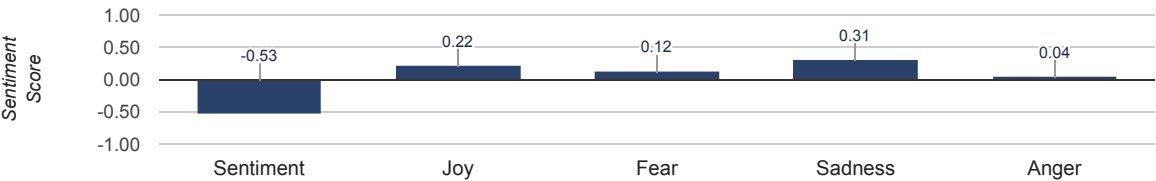

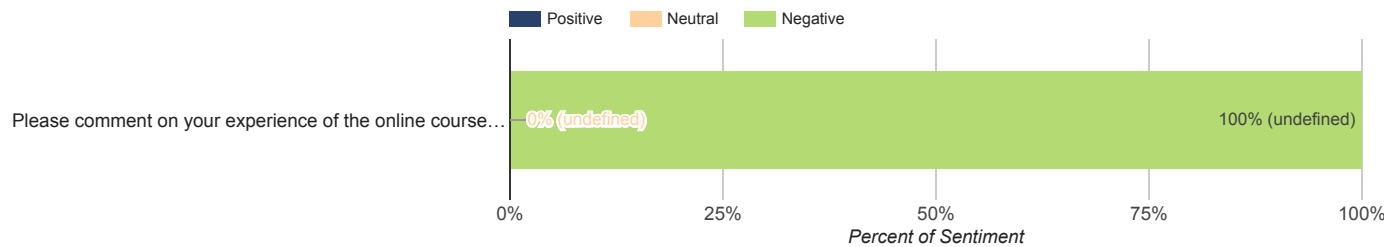

1   This is the second class I felt I actually was motivated to learn! Only that there still wasn't enough time to take in more before moving on to the next set of chapters.

2   In general, the instructor is super great! Just maybe schedule the course outline better.

Questions to Assess Students' Online Experience (1 comments)

Q: Please comment on your experience of the online course environment in the open-ended text box.

1   It was a bit confusing at first accessing the location for course material and information.

   Similarly, it was hard to track which deadline to meet since previous homework's due date also immediately has a posting for new homework announcement for next class.

   Lastly, last minute additions to deliverables should be discouraged. ★★☆☆☆

Student Self-Assessment of their Effort to Achieve Course Outcomes (3 comments)

Q: What I could have done to make this course better for myself.

1	Written extensive programs and pre-read bunch of books on operating systems.
2	I would say, spend more time on it.
3	learn about c/c beforehand
