Q: What were the strengths of this course and/or this instructor?

1 It was very informational and there was always enough resources to learn.

2 I want to start by saying Professor Shah is an amazing professor. He knows what he's talking about and is enthusiastic about the material. This is so important in the learning process. I thought the course was well structured and I learned so much in this course. Would take again.

3 Mastery of the subject, and interest in it, and the ability to TEACH it. Many professors at Northeastern clearly understand topics but do not have the ability to explain it to those with no experience. He clearly explains things, and in multiple ways, has great lecture and extra resources, and well designed assignments.

Q: What could the instructor do to make this course better?

1 Sometimes there are strange issues in C and it would be nice if there were more office hours to deal with them.

2 I wish homework assignment grades were released sooner so I could know how I did on the assignment before I worked on the next assignment. This course is cumulative in its material so it would have been nice to know if my understanding was correct.
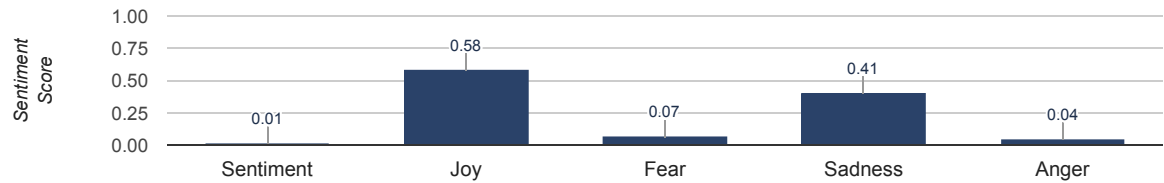

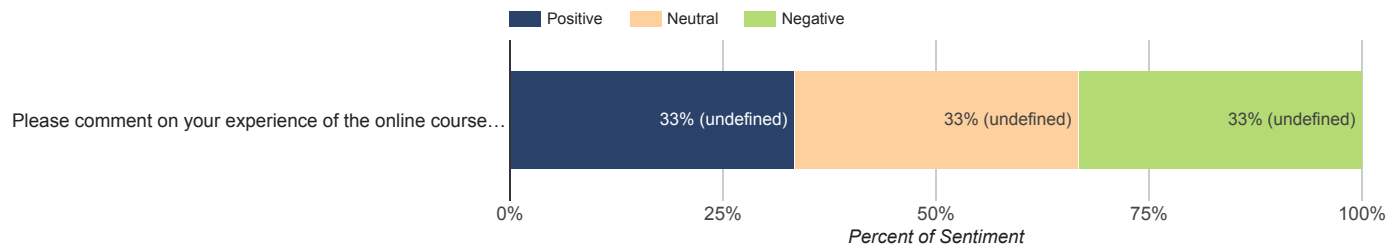

Professor Shah is so friendly and helpful during office hours, I just wish he offered more sign-ups than one hour per week. Though you can reach out if you can't meet during that hour to schedule an office hour.

Questions to Assess Students' Online Experience (3 comments)

Q: Please comment on your experience of the online course environment in the open-ended text box.

1 It was asynchronous but very informational. ★★★☆☆

2 I do wish there was a better sense of community for online courses. I don't feel like I got to know anybody throughout the semester and I feel like that's a shame. I think there should be more group assignments, or pre-defined study groups/activities, or events to meet other students. ★☆☆☆☆

3 Best course (not even just online) that I've had at northeastern. Clearly organized. Fairly sized assignments. Good pace of learning. Great lecture, great examples, great assignments. ★★★★★
