Instructor Related Questions: John Alexis Guerra Gomez (22 comments)

Q: What were the strengths of this course and/or this instructor?

1   Motivated students to ask more questions during lectures.
Kept the student engaged in class by having the lottery system
Very interactive class session which helped me learn a lot

2   introduce the concept

3   expertise in the domain

4   Professor Guerra's experience is truly what makes this class' experience memorable. I enjoyed being a student of HCI.

5   Professor is very responsive and has a great passion about HCI. He is knowledgable.

6   Experience

7   I this course was really interesting, especially to get a non-programming or coding based course

8   The instructor has strong belief and passion in what he teaches, which makes it easy for students to develop an interest and think more about the materials.
My favorite part of this course is that it respects and invites knowledge of and experience in other fields of study. It makes me rethink how I can contribute uniquely to the industry with my non-CS background and interests.

### Q: What could the instructor do to make this course better?

1   Keep a more organized syllabus schedule and post the homework on canvas a little earlier

2   adding more content

3   timely notification

4   Writing down detailed homework assignments over leaving some notes during lecture time.

5   Please give more details early in written form about homework

6   I hope there are more information that is not limited to just the reading. I wish there are more actual examples and maybe some live coding.

7   Real-time projects

8   I think having the full title of the reading rather than just seeing "PSR" would be better for finding readings in the syllabus.

9   For big assignments/projects, I hope the instructor can make announcements earlier, so we have more time to prepare.
Some readings are not exciting as others, and it's hard to say how relevant or helpful that knowledge could be. I hope we can discuss more recent case studies/examples/products to make some concepts more relevant and offer more context for each class.

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

1   The lottery system by the professor made the class very inclusive and helpful in learning
The readings assigned every week were very useful in understanding the course topics in depth

2   Well material organized

3   The course is well-structured and robust. I liked the direction that was taken and the way it was led through this semester.

4   I hope Professor could save time by not using the time to write assignment in class time.

5   I have nothing further to add to what I've already said

1   Great experience! ★ ★ ★ ★

2   Overall very interesting course with rich exposure to UI/UX concepts which improved my design skills or even better 'built' them from the ground up. ★ ★ ★ ★ ★

3   The in-person streaming is ridiculous in itself though professor manages it very well. ★ ★ ☆ ☆ ☆

4   No complains from me ★ ★ ★ ☆ ☆

Student Self-Assessment of their Effort to Achieve Course Outcomes (6 comments)

Q: What I could have done to make this course better for myself.

1   Timely notification

2   Writing extensively detailed homework assignments on Canvas so as to know in advance what to prepare or to do for the assignment.

3   i could've read all the readings, which is almost impossible!

4   It's too much theory and reading!! If there is way to have practical exposure that will be great

5   N/A

6   I should have organized my notes better and kept up with additional readings that Professor recommended in the class.
