Instructor Related Questions: Ian Gorton (2 comments)

### Q: What were the strengths of this course and/or this instructor?

1   Course included all new tech like AWS , go language and different databases which was strength of this course but there was no sufficient material to refer.

Q: What could the instructor do to make this course better?

1   Balance between assignment and quizzes along with additional material for AWS for people who don't have any experience in AWS.

1   I felt that this course demands a very in-depth knowledge of AWS, and there is no course in the whole program that supports that demand. I felt helpless many times when I didn't find any solution or how to work with AWS. Not a good experience with the course material as well, as there was no material to refer to for AWS operations, and AWS documentation is too complex to cover along with the difficulty of this course. ★ ☆ ☆ ☆

Student Self-Assessment of their Effort to Achieve Course Outcomes (1 comments)

Q: What I could have done to make this course better for myself.

1   I worked for around 30 hours a week just to complete an assignment, so there was no balance between assignments and self-learning for quizzes. The last two quizzes had just a one-week difference, which was insufficient to learn the entire book and complete assignments as well. It felt like I was always rushing for either assignments or stuck with assignments and then quizzes.
